

A Better Way to Deliver Projects

A Value-Based Contract Model

May 21, 2013
9:00am – 11:30am

East Side Education Center
2401 Scott Blvd.
Iowa City, IA 52244

Learn the latest techniques and strategies to achieve the following:

- *Reducing cost while increasing performance*
- *Risk minimization*
- *Increasing operational efficiency*
- *Best value contract management*
- *Implement Best Value in current environment*
- *Applications in construction, software/IT, and service-related procurements*

The Performance Based Studies Research Group (PBSRG) from Arizona State University has developed a Best Value Business Model which has proven to consistently increase the efficiency of procurement and project delivery services. The model has been tested and refined on over 1,500 projects (totaling \$5.7 Billion) since 1994. Successful implementations include \$5.5B in University dining services contracts, University capital construction project management (350 projects valued at \$332M), and local municipality (city, county, school district) construction (95 projects valued at \$120M)... all with a 98% customer satisfaction and 1.3% contractor change order / delay rate.
